(Project ACCCESS)**

Individual/Group Project Summary

Title: Calc ?s

Project Member(s): Greg Cripe

Describe the problem, issue, or area of interest and the context. Students not catching the “broader” picture in calculus.

Define your desired goals, or “outcomes.” A list of questions for a faculty member to give students at the beginning of class to promote deeper understanding.

Describe your “indicators” of success. List of questions was generated. Faculty member who originally wanted help was satisfied with the questions.

Describe your project. Questions were generated, later sold to Brooks-Cole.

Describe your results. I accomplished my goal of writing the questions. I was fairly happy with how the questions came out. In reality I wish I had a bit more time to make/proof the questions but a publishing deadline loomed.

Describe your evaluation methods. I did not evaluate this project.
